

Asbestos & Demo Service Providers

A MESSAGE FROM SPOKANE REGIONAL CLEAN AIR AGENCY

BACKGROUND

We receive requests for names of companies that conduct asbestos surveys, abatement/removal, training and demolition work. Below are companies that have contacted us to be added to the list. The listing is not an endorsement by Spokane Clean Air. It is up to you to re-search a company's credentials prior to hiring them.

Research companies prior to hiring

The Washington State Department of Labor and Industries has guidance on hiring and working with contractors: <https://lni.wa.gov/licensing-permits/contractors/hiring-a-contractor/>

In general, be wary of companies that:

- Use high pressure sales techniques
- Accept only cash
- Don't provide a written estimate
- Want to work only evenings and weekends
- Give you an offer that sounds too good to be true

Asbestos Testing labs

Asbestos surveys include bulk testing to determine if asbestos is present. Samples must be analyzed by a National Voluntary Laboratory Accreditation Program /accredited laboratory.

Spokane-area asbestos bulk sampling lab:

Mountain Laboratories, 509-922-1365

You can conduct your own search for accredited sampling laboratories in other areas of Washington and beyond. The WA Department of Ecology has an on-line laboratory search directory: <https://apps.ecology.wa.gov/laboratorysearch/SearchAnalyte.aspx> to search for laboratories capable of asbestos analysis.

Other resources

A searchable database of violation histories is available at spokanecleanair.org/about/civil-penalties/

Other publications that may be helpful:
